

WatchMan3000N Patrol Tour Collection Terminal

Get patrolling movements by your security personnel recorded accurately and unalterably with WatchMan3000N Patrol Tour Collection Terminal. Consisting of a mobile and a base unit, the handy and waist pouched mobile unit WatchMan3000N collects codes of RFID tags with date & time stamps at locations patrolled by the security personnel. The base unit BC3000N interfaces the mobile unit with PC for initial setting of mobile units' ID's and date & time and uploading the collected data for view and archiving. A Patrol Manager software (optional) gives detailed analysis of the data.

Company profile:

Giga-Tms was established in Taiwan in 1987 as a magnetic technology products manufacturer. Ten years later, as soon as the company's CEO noticed the new RFID technique, he immediately foresaw its potential and engaged the R&D group in RFID. Now with its 21 years experience, Giga-Tms owns not only proven RFID techniques of superior standard but also makes reliable products for long life.

Giga-Tms always takes into account providing flexible and customized services to every customer.

Although based in Taiwan, Giga-Tms exports 90 percent of the annual production mostly to worldwide market.

Now in its 21 year, Giga-Tms is looking to strength its image through increased advertising, while remaining faithful to its principles: prioritize the customer.
