

## Privacy Customer Pole Display

The DSP801 and DSP802 are designed for the usage as the Privacy Customer Desktop Displays providing the configuration to integrate with the POS system for the pharmacy or the drugstores requiring basic privacy protection of customers. With the compact and slim ID design, on screen data is visible only to persons directly in front of the sales counter or the sales person. Passers by are not able to see the screen when viewed from the side. DSP801 and DSP802 offer privacy with easy to catch images so the customers get more privacy environment in the shop site. They help the retailing stores serve more customers with their shopping items which be concerned more about some personal stuff, medical items....etc.

**DSP802

- Retailing store.
- Chemist's shops.
- Drugstore.

### Company profile:

Giga-Tms was established in Taiwan in 1987 as a magnetic technology products manufacturer. Ten years later, as soon as the company's CEO noticed the new RFID technique, he immediately foresaw its potential and engaged the R&D group in RFID. Now with its 21 years experience, Giga-Tms owns not only proven RFID techniques of superior standard but also makes reliable products for long life. Giga-Tms always takes into account providing flexible and customized services to every customer. Although based in Taiwan, Giga-Tms exports 90 percent of the annual production mostly to worldwide market. Now in its 21 year, Giga-Tms is looking to strength its image through increased advertising, while remaining faithful to its principles: prioritize the customer.
